## Description of the research unit

The Veterinary and Animal Science Research Centre (CECAV), hosted in the University of Trás-os-Montes and Alto Douro (UTAD), is a National Research Unit funded by the Portuguese National Agency for Science, Research and Technology (FCT).

Since 2021, CECAV has been part of the Associated Laboratory of Animal Science and Veterinary Science (AL4Animals) together with CECA (Centre of the Studies on Animal Science; Oporto) and CIISA (Centre for Interdisciplinary Research in Animal Health, Lisbon).

The main objective of CECAV is to develop research in animal and veterinary science to generate new knowledge in animal health and welfare and in the production, safety and quality of meat and meat products. To achieve this objective, its activity focuses on the following main research topics:

- a) Integrated Meat Quality in an approach “From the field to the fork”

Integrated Meat Quality whose main objectives are (1) to develop research focused on the use of *in vivo* non-invasive techniques as tools to evaluate body composition and to estimate carcass composition and quality of farm animal species, and (2) to assess factors that may affect sensory and chemical characteristics of meat and meat products and evaluate strategies (e.g. packing, natural additives) to control spoilage and pathogenic microflora;

- b) Veterinary Public Health under the “One Health concept”

The research in Veterinary Public Health is focused on two interrelated topics: (1) diagnostic and prognostic of factors related to biological issues and the use of biomaterials for tissues regeneration, using animal models and contributing to animal and human health and welfare, and (2) the study of prevalence and integrative epidemiological studies on zoonosis affecting animals and foodborne pathogens from food of animal origin and contributing to their monitoring and to the evaluation of strategies for its mitigation.

The organization of CECAV is included in the regulation published in the Portuguese official journal (Diário da República, 2nd Serie, n°36, 20th February 2012).

The governing bodies of CECAV are:

- The Scientific Council (SC);

The Scientific Council is composed of all integrated members and meets regularly (3 or 4 times a year). In addition to the main competencies contained in its regulation, the Scientific Council promotes internal cooperation, fosters dialogue and the exchange of ideas

- The Director,

The Director is elected by the Scientific Council every three years and among his competences is the choice of the Executive Board.

- The Executive Board (Directive board)

The Directive Board is composed of the Director and three Vice-Directors. Besides ensuring the administrative and financial management of CECAV, its main activities are to prepare the documents to submit to the Scientific Council for approval and propose to the Scientific Council the allocation of financial resources to the different research activities and topics of CECAV.

Following the regulations of FCT, CECAV has an External Advisory Committee, composed of three experts in the scientific areas of CECAV: José Lorenzo Rodrigues (Technological Meat Centre, Orense, Spain) and Laura Peña (Complutense University of Madrid, Spain). They are expected to visit CECAV twice or three times during 2020-2023.

In 2022, CECAV includes 61 integrated members (51 researchers from UTAD, 6 researchers from institutions outside UTAD, 3 postdoctoral members with a scholarship and 1 Junior Research hired in March 2022). CECAV also has 13 doctors as collaborators and 41 PhD students, 15 of them are scholarship holders.

The criterion required to be an integrated member of CECAV is based on its scientific productivity in the former three years. Criteria for distribution of the FCT base funding are also centred on the scientific productivity of the researchers, which is scored/graded according to the number, type (book and book chapter, full paper, review article, short note/short communication, case report, letter) and quality (quartile in category) of the manuscripts published on international peer reviewed journals (SCOPUS or ISI).

The facilities of CECAV are located at UTAD, mainly at the School of Veterinary and Agrarian Sciences (ECAV) and includes several laboratories and experimental animal facilities. The main laboratories that support the research activity of CECAV are: Laboratory of Technology, Quality and Food Safety (LQSA), Laboratory of Histopathology and Veterinary Pathological Anatomy (LHAP), Laboratory of Parasitology, Laboratory of Medical Microbiology, Laboratory of Animal Nutrition (LabNut) and Laboratory of Reproduction. The animal experimental facilities include an Experimental Unit for the Study of Carcasses and Meat, the Experimental Facilities of Animal Nutrition (Experimental Unit Arnaldo Dias da Silva), the Hunting Studies Centre and several experimental facilities of animal production. The Veterinary Hospital of UTAD (HV-UTAD) and the Wildlife Recovery Centre (CRAS) are also an important structure for the scientific activity of CECAV researchers and students.

The CECAV was granted 533,000 euros over four years as basal financing and 355 000 Euros as programmatic financing. In addition, the research projects running at CECAV also had external financing of 524,240 euros from financed projects. The detailed information about these projects is presented in the “Funded projects and thematic networks” section.

## **Scientific activity**

The following aspects guide the CECAV activities:

- (1) to promote research with impact in the animal and veterinary sciences field, through the participation in research projects and thematic networks and by the cooperation with other national and international institutions;
- (2) to disseminate knowledge through the organization and/or the participation of scientific events and by the publication of articles in a top-ranking scientific journal;
- (3) to develop post-graduation formation by supporting the 3rd cycle of Animal Science and the 3rd cycle of Veterinary Science.
- (4) to promote the transfer of knowledge to stakeholders and society.

The main scientific activities of CECAV during 2022 are listed below and include:

Financial projects and networks,  
Publications,  
Formation, and  
Events (participation and organization).

## **Financed projects and networks**

In 2022, CECAV researchers were involved as members of the team of 11 research projects and 6 Cost Actions. Almost all of the projects were in collaboration with other universities or research institutions, mainly in the area of animal production, animal health and meat quality and safety.

A list of the ongoing projects and networks is presented below. These projects are listed in alphabetic order:

**AgriFoods XXI – Development and Consolidation of research in the AgriFood sector in Northern Portugal**  
Funding source: FEDER, through the Operational Program NORTE 2020  
Total funding: 2 353 869,65€  
Funding for CECAV/UTAD: 132 000€  
Leading institution: CQ-VR/UTAD  
Period: 2020-2023.

**AptaColi – NAM-aptameros para bloqueio de enterotoxinas na colibacilose em porcos.**  
Funding source: FEDER, through the Operational Program NORTE 2020  
Total funding: 1 500 000€  
Funding for CECAV/UTAD: 49 907,50€  
Leading institution: INIAV  
Period: 2020-2024.

**Bis+Olive - Use of olive pomace in the feeding of Bísaro pigs. Evaluation of the effect on growth and meat quality. Co-promotion project.**

Funding source: FEDER, through the Operational Program NORTE 2020

Total funding: 592 302,40€

Funding for CECAV/UTAD: 132 852,96€

Leading institution: BISARO – Salsicharia tradicional

Period: 2021-2023.

**C3C - caça–capacitação, competitividade e comunicação.**

Funding source: Fundo Florestal Permanente

Total funding: 199 040,00 €

Leading institution: Clube Português de Monteiro

Period: 2021-2022.

**COST Action CA16230 - Combatting anthelmintic resistance in ruminants (COMBAR).**

Funding source: H2020 COST-Action

Period: 2018-2022.

**COST Action CA18105 - Risk-based meat inspection and integrated meat safety assurance (RIBMINS).**

Funding source: H2020 COST-Action

Period: 2019-2023.

**COST Action CA18113. Understanding and exploiting the impact of low pH on micro-organisms (EuroMicroPh).**

Funding source: H2020 COST-Action

Period 2019–2023.

**COST Action CA18217. European Network for Optimization of Veterinary Antimicrobial Treatment (ENOVAT).**

Funding source: H2020 COST-Action

Period: 2019–2023.

**COST Action CA21111 – One Health drugs against parasitic vector borne diseases in Europe and beyond (OneHealthdrugs)**

Funding source: H2020 COST-Action

Period: 2022-2026.

**COST Action CA21145. European Network for diagnosis and treatment of antibiotic-resistant bacterial infections (EURESTOP).**

Funding source: H2020 COST-Action

Period 2022 – 2026.

**Determinação do perfil tiroideo em Lince Ibérico.**

Funding source: Empresa farmacêutica IDEXX Global, USA.

Total funding CECAV/UTAD: 3500 Euros.

Period: 9/2021-5/2022

**Effect of EPA and DHA supplementation on renal function biomarkers and systolic blood pressure of proteinuric and borderline proteinuric cats diagnosed with chronic kidney disease**

Funding source: EveryCat Health Foundation Feline Kidney Disease Fund

Total funding: \$33,942 USD

Funding for CECAV/UTAD: \$33,942 USD

Leading institution: CECAV/UTAD

Period 2022-2024.

**Manual do Pastor 4.0.**

Funding source: PDR2020

Financiamento CECAV/UTAD: 19 493€

Leading institution: Comunidade Intermunicipal do Tâmega e Sousa.

Period: 2019-2022.

**oneHCancer – One Health approach in animal cancer**

Funding source: FEDER, through the Operational Program NORTE 2020

Total funding: 499.999,99€

Funding for CECAV/UTAD: 330 000€

Leading institution: CECAV/UTAD

Period: 2021-2023.

**Preservar a qualidade na Carne Arouquesa**

Funding: FEDER, through the Operational Program NORTE 2020

Total funding: 331.504,32€

Funding for UTAD: 227.178,56€

Leading institution: UTAD

Período de trabalho: 2017-2022.

**SUSPHAGE - Development of a phage-based product to control E. coli associated post-weaning diarrhea in piglets, Projeto em copromoção**

Funding source: COMPETE 2020, Portugal 2020, FEDER

Total funding: 695 097€

Funding for CECAV/UTAD: 154 466,15€

Leading institution: CEB (Centre of Biological Engineering)

Period: 2018-2022.

**TraDACA – Diagnóstico e tratamento da displasia da anca no Cão**

Funding source: FEDER, COMPETE 2020

Total funding: 418.360,24€

Funding for CECAV/UTAD: 289.043,48€

Leading institution: UTAD

Period: 2021-2023.

**Wasting Prion Risk - Chronic Wasting Disease Risk Assessment in Portugal**

Funding source: FCT - Fundação para a Ciência e a Tecnologia (Compete 2020, PT2020) e FEDER -

Fundo Europeu de Desenvolvimento Regional

Total funding: 239.898,90 €

Funding for CECAV/UTAD: 201 772€

Leading institution: CECAV/UTAD

Period: 2018-2022.

## **Publications**

During 2022, CECAV researchers published 147 articles in international peer review journals (142 referenced in Scopus), including full papers (113), reviews (18), short report/short communications (7), case reports and letters (4). Most of them (90%) were published in Q1 or Q2 journals.

In 2022, 1 book and 6 chapters of international books were published (including 4 referred in Scopus).

Technical-scientific publications (4 books/book chapters and 15 articles in journals) are also listed, mainly in Portuguese, which are an important way of transmitting knowledge to society.

In the lists below, the CECAV members are underlined.

## Formation

In 2022, 45 doctoral students (including 16 students with a scholarship) are developing their research work at CECAV. Most of these PhD students are from the Doctoral programmes anchored in CECAV; the

Animal Science and Veterinary Science Doctoral Program and Animal Science Doctoral Program. During 2022, 7 PhD students were finished their doctoral thesis.

Most of the researchers at CECAV are professors and they also develop an academic career, establishing a very important link between teaching and research for undergraduate and master students. A large number of master students are involved in the research activities of CECAV while they develop their dissertation work. In 2022, the orientation of master students (88 students) continued as an important activity at CECAV.

This lists below include Doctoral thesis and Master dissertations concluded in 2022 and oriented by researchers of CECAV.
